

RHINOPLASTY SURGERY

Nose Surgery in Tijuana Mexico

To enhance your nose

Rhinoplasty or nose reshaping is one of the most common facial surgeries done. It can be done as an elective cosmetic surgery or as a functional surgery to improve breathing. Part of what plastic surgeons call middle third surgeries, rhinoplasty, when combined with a new lift and brow lift, can enhance a person's appearance.

When Dr. Sergio Soberanes combines the neck lift, brow lift, rhinoplasty and eye lid surgery, the result is a youthful neckline with no creases soon the forehead and no bags under the eyes that gives the person a more youthful appearance.

This is one of the most requested aesthetic procedures

We offer you the possibility to improve the aesthetic of your nose and, if necessary, to correct an existing breathing problem, all the at the same time in our state-of-the-art surgical facility. We can also completely reshape the angle between your nose and upper lip to give you a new image.

Rhinoplasty or nose improvement

Every year, half million people who are interested in improving the appearance of their noses seek consultation with facial plastic surgeons.

Some are unhappy with the noses they were born with, and some with the way aging has changed their nose. For others, an injury may have distorted the nose, or the goal may be improved breathing. But one thing is clear: nothing has a greater impact on how a person looks than the size and shape of the nose. Because the nose is the most defining characteristic of the face, a slight alteration can greatly improve one's appearance.

Whether the surgery is desired of functional or cosmetic reasons, your choice of a qualified facial plastic surgeon is of paramount importance.

Dr. Sergio Soberanes will examine the structure of your nose, both externally and internally, to evaluate if you need septum reconstruction as well as what you can expect from rhinoplasty. You are most likely to be pleased with the results of your surgery if you have a realistic idea of what nasal surgery can and cannot do.
